

CUSTOM GALLERY - LIBRARY

Recreated Chandelier 3D-2494

PROJECT: North Berkeley Library 2012
ARCH: Tom Elliot Fisch and Architectural Resources Group
LTG DESIGNER: Illuminosa

8D-2949

The North Branch Library was designed by the Berkeley architect James Placheck in 1936. The restored library was dedicated in April 2012 and was funded by the City of Berkeley and private donations. New lighting was provided by both new fixtures and restoring existing fixtures. Working closely with the architects and the lighting designer, Borden recreated the rotunda chandelier and decorative schoolhouse fixtures from old photos. The existing entry lanterns were restored. The new table lamps were designed to be mounted to existing tables that had been restored.
