

REFURBISH ... REPLICATE ... RE-CREATE

Often when existing buildings are being renovated they have lighting fixtures worth saving. Sometimes they may have existing fixtures but some fixtures are missing and/or there may be a need for replacements or replicas. Frequently, only photos or possibly drawings of fixtures that were originally part of the building exist. Occasionally we are asked to create fixtures based on, or in the style of, other period fixtures.

Borden Lighting has done all the above. With our skilled craftspeople and depth of experience, we embrace the challenge. So whether you are seeking **Refurb**, **Replicate** or **Re-create**, Borden can help you develop solutions that meet the job requirements.

The photos here illustrate examples of all three types of saving or re-creating period lighting fixtures.
