NEW PRODUCTS NEW PRODUCT GUIDE

With the second edition of our Product Guide, we are proud to introduce six new ceiling and pendant mounted fixtures. Our product line now includes 63 fixtures with over 30 fixtures offering LED. The new fixtures are purpose-built for LEDs, with no other lamping offered. They all offer energy and maintenance savings, while being value priced when compared to similar CF fixtures. Using Bridgelux's 3rd generation arrays, all the fixtures offer array efficacies of 89-94 lumens per watt. All fixtures offer 3000K and 80CRI, with 2700K and 90CRI available.
