

## FINISH & FABRIC UPDATE

DOVE POLYESTER (DOV) shown on 103 series.

Hand-rolled edge detail      Self-fold & tape detail

**FABRICS:** Click [HERE](#) for an overview of our fabric offering.

In our on-going efforts to source materials with high recycled content, we are introducing a new fabric that will be available on all our fixtures using fabric. The new optional material is DOVE POLYESTER. This material is made from 65% recycled content. In addition, it is washable, meeting the needs of hospitals, schools and other commercial and institutional projects. there is a modest up-charge for this fabric, about the same as the premium linens we offer. It will replace the Hemp and Organic Cotton "Eco-Fabrics" which will be discontinued. This new fabric is shown in the photos to the left.

In addition, we are now offering a "hand-rolled edge" detail for all our fabric fixtures, also shown to the left. This option is offered for a modest up-charge in lieu of our standard "self-fold and tape" trim detail which is an industry standard.

Fabric, like color, has endless possibilities. While our fabric selection meets the needs of the majority of projects, we are happy to source special fabrics. We can also fabricate the shades using "owner supplied" fabrics. Contact your rep or the factory for further information.

**METAL FINISHES:** Click [HERE](#) for an overview of all our metal finishes.

**STANDARD FINISHES:** Borden Lighting's most prevalent metal finish is our Satin (aka "Brushed") Aluminum finish. Our Satin Aluminum is our most sustainable finish in that it is hand-finished and sealed with wax, avoiding the air and water quality issues with paint or clear coats. This finish allows the natural quality and depth of the metal to be appreciated. Depending on the fixture, we offer other natural metal finishes, for many fixtures.

**CCP:** We offer a limited pallet of painted finishes that are intended to be compatible with most interior and exterior architecture. Color, like typesetting fonts, is an endless subject, so our approach is that we are happy to provide a Custom Color Paint (CCP) finish for any of our fixtures, where we will match a sample of the color. (Having a sample is important in that it avoids the chance of a typo in transmitting a color number.)

**NEW COLORS:** In addition to CCP, we are introducing a pallet of muted colors, shown below. These sophisticated colors are intended to be compatible with contemporary spaces and have been selected by a color consultant. They are available for most interior fixtures. Check the web catalog pages for availability.

**NOTE:** Colors display and print differently depending on equipment. For accurate color match call for swatches.

Buff (BUFF)

Beige (BGE)

Gray (GRAY)

GREEN (GRN)

GRASSLAND (GRS)
