

# LIGHTING FOR LIBRARIES

March  
2017

**PROJECT:** CSLI Monterey Bay  
Tanimura & Antle Family Memorial Library

**ARCH:** EHDD Architecture - San Francisco, CA

California State University, Monterey Bay, is a new campus created at the former Ft. Ord Military base. The LEED designed building features a towering atrium with abundant natural light. The task lights are individually switched and use 2-13 watt CF lamps. Originally planned to have data ports, they were eliminated because of wi-fi, but they do include a power outlet. Borden also made the companion floor lamp.
