Architect: Tom Eliot Fisch and
Architecture Resources Group

Ltg Designer: Illuminosa

ALAMEDA WEST END LIBRARY

Architect: Page and Moris

Ltg Designer: Illuminosa

While some may have predicted that libraries would not survive the age of the internet, the last decade had seen resurgence in libraries, both renovation and new. Borden Lighting is proud to have collaborated on the library projects shown here. Each of these projects illustrate the trend to individual control and the provision of power for computers. All involve coordinating installation on new, or in the case of both the Alameda and Berkeley libraries, existing tables.
